The design plan will form part of the proposed Development Application ('DA') which the Executive Committee intends to lodge with GTCC. The Executive Committee and Owners Corporation reiterated that any proposal prepared (to construct an effective seawall) will be by those with expertise in this field of work. The Owners Corporation reaffirmed its decision to lodge a DA for an appropriately designed seawall.

It was also highlighted and subsequently agreed that until the construction of the proposed seawall commences (whenever that may be), it was important to continue with current preventative measures to ensure that the beachfront is not further eroded.

Ron Carlyle expressed his personal concerns that, amongst other things, the proposed seawall will be ineffective and that a solicitor should be engaged to determine whether a DA can actually be lodged.

- (b) **RESOLVED** that the EC be authorised to keep neighbours and any interested parties informed of its current actions in relation to the beachfront erosion problem given that remedial action will need to be coordinated with a wide range of external parties to obtain the required support to submit a DA for a seawall.
