

Saving our Species project 2013-14 annual report card

Floyd's Grass

Species attributes

Scientific name:	<i>Alexfloydia repens</i>
NSW status:	Endangered
Commonwealth status:	Not listed
Management stream:	Site-managed

Photographer: Shane Ruming

Overall project status*

- Populations at all key management sites are generally stable or increasing
- All management is being implemented as planned; too early to detect response to management at some sites
- Management at some sites requires review/amendment to ensure that the project is likely to meet its objectives
- Major review of / changes to the project required to ensure long-term objectives are likely to be met

*For SoS priority management sites (may not include all locations where the species occurs in NSW)

Project summary

Key management sites:	Bongil Bongil; Diggers Headland
Action implementation:	4 of 4 actions were implemented as planned for the financial year (includes species population monitoring actions + other project actions fully or partially implemented)
Total expenditure:	\$11,918 (cash and in-kind)
Project partners:	Coffs Harbour City Council; Office of Environment and Heritage

Management site 1: Bongil Bongil

LGA: Coffs Harbour

Project partners: Office of Environment and Heritage

Species population monitoring action

Reported trends are based on best available information

Estimated population	Population monitoring conducted
Unknown	No

Investment

This includes cash and in-kind contributions

Project participant	Investment
Office of Environment and Heritage	\$8,618

Project actions

The project actions below are those identified as being required in 2013-14 to secure the species in the wild

Threat	Management/monitoring action description	Implemented as planned?
Invasion by weeds, particularly Lantana (<i>Lantana camara</i>) and Broad-leaved Paspalum (<i>Paspalum mandiocanum</i>).	Pastox or Glyphosate 1:100 sensitively applied (e.g. wick-wiping) and spraying in limited circumstances.	Yes
Invasion by weeds, particularly Lantana (<i>Lantana camara</i>) and Broad-leaved Paspalum (<i>Paspalum mandiocanum</i>).	Full floristic plots (5m X 5m) in weed infested areas plus controls.	Yes

Site summary

This site has been successfully weeded using Office of Environment and Heritage resources. A baseline comprised of floristic plots has been established for monitoring the effectiveness of the weeding program.

Management site 2: Diggers Headland

LGA: Coffs Harbour

Project partners: Coffs Harbour City Council; Office of Environment and Heritage

Species population monitoring action

Reported trends are based on best available information

Estimated population	Population monitoring conducted
Unknown	No

Investment

This includes cash and in-kind contributions

Project participant	Investment
Office of Environment and Heritage	\$3,300
