Schedule B - Guidelines for Presenting Final Reports for the Research Seeding Grants Program

This document outlines what your report to the Trust should cover. Your project may also produce other reports, documents, publications or materials – the nature and scope of these depend entirely on your specific project and are not the subject of this document.

Why we require reports

The Trust needs project reports in order to be satisfied that our investment in your project contributes to achieving environmental outcomes and funds are appropriately spent. Reporting also:

- provides you an opportunity to evaluate your project,
- informs the Trust where environmental benefits can be spread beyond your project, and
- assists the Trust in developing future funding programs and policies.

What we do with your project report

Your report will be reviewed by the Trust and/or any other people we think necessary, to assess, performance and achievement. This review can cover both administrative aspects (e.g. financial, timeframes and milestones) as well as technical aspects. We will provide feedback from this review when acquitting your grant.

Final project reports (except the financial information) are generally placed in the Department of Environment and Climate Change NSW library and the Trust may also place them on its website and otherwise make them publicly available.

Key Performance Indicators (KPIs) - measurable outcomes to be reported on in your Final Report.

To assist the Trust to measure the impact/success of its funding programs you will be asked to respond to a number of questions when submitting your final report. To allow you to plan for this from the beginning of your project, the information required of you is detailed below.

You will be required to provide information on each of the following indicators as relevant to your project. The Trust may revise these indicators from time to time to feed into local, regional and state environmental reporting requirements. If you do not consider it something you are able to report on for your specific project you will mark the box with 'N/A'. Most responses will be numeric, whereas other questions may require a 'yes' or 'no' response.

Indicators for the **Research Program (including Seeding Grants Program)** are listed below:

- number of people who directly participate in project activities
- whether your project involved formal partnerships between government and the community. If so, the number of partners involved
- number of innovative technologies or methods developed as a result of the research
- number of technical or scientific conferences at which the research was presented
- number of other events at which the research was presented (can include community workshops, radio or other interviews, magazine or newsletter articles, etc.)
- number of post-graduate students involved in the project
- number of research publications on the results of the research project.

Specific Project Measures

While it is important that the Key Performance Indicators listed above are reported upon, it is essential that performance tracked against measures specific to your project also occurs. This will allow you to determine whether implementation of your project has resulted in the achievement of objectives and anticipated outcomes.
